## Data Release Information Sheet

### ***Data Summary***

Dataset name: Global Burden of Disease Study 2016 (GBD 2016) Alcohol Use Estimates 1990-2016

Date of release: August 23, 2018

Summary:

The Global Burden of Disease Study 2016 (GBD 2016), coordinated by the Institute for Health Metrics and Evaluation (IHME), estimated the burden of diseases, injuries, and risk factors for 195 countries and territories and at the subnational level for a subset of countries.

As part of this study, estimates for alcohol use and the disease burden attributable to this risk factor were produced by sex, age group, and year for 195 countries and territories for 1990-2016. Estimates for alcohol-attributable deaths and disability-adjusted life-years (DALYs) are available from the [GBD Results Tool](#). Files available in this record include estimates of the prevalence of current drinking, abstinence, and the population average of standard drinks daily. Study results were published in *The Lancet* in August 2018 in "Alcohol use and burden: a systematic analysis from the Global Burden of Disease Study 2016 for 195 countries and territories, 1990–2016."

***Data Files Information***

<b>Variable</b>	<b>Variable Label</b>	<b>Variable Definition</b>
measure	Measure	The measure (indicator) of the estimate
location_ID	Location ID	Unique numeric identifier for the location generated and stored in an IHME database of data dimensions

location_name	Location Name	Location of the estimate
sex_ID	Sex ID	Unique numeric identifier for the sex generated and stored in an IHME database of data dimensions
sex_name	Sex	Gender for the estimate
age_group_ID	Age Group ID	Unique numeric identifier for the age group generated and stored in an IHME database of data dimensions
age_group_name	Age Group Name	Age group estimated
year_ID	Year	Time period of estimate
metric	Metric	Metric/unit of measure for the estimate
mean	Mean	Mean estimate
lower	95% uncertainty interval (lower bound)	2.5% percentile estimate
upper	95% uncertainty interval (upper bound)	97.5% percentile estimate
