Data Release Information Sheet

Data Summary

Dataset name: Development Assistance for Human Resources for Health 1990-2020

Date of release: June 11, 2022

Summary:

These development assistance for human resources for health (DAHRH) estimates are generated using data from IHME's [Development Assistance for Health \(DAH\) Database](#), [COVID development assistance database](#) and the Organization for Economic Cooperation and Development's Creditor Reporting System (CRS) online database. The DAHRH databases enables comprehensive analysis of donor funding aimed towards activities that support the health workforce in low- and middle-income countries from key agencies. The DAHRH estimates are disaggregated by source of funds, channel (disbursing agency) of funding, geographic region (Global Burden of Disease Study (GBD) super region), and the type of human resources for health activities supported (program areas).
