Data Release Information Sheet

Data Summary

Dataset name: Global Burden of Disease Study 2019 (GBD 2019) Relative Risks

Date of release: October 15, 2020

Date of Update: May 13, 2022

Summary:

The Global Burden of Disease Study 2019 (GBD 2019), coordinated by the Institute for Health Metrics and Evaluation (IHME), estimated the burden of diseases, injuries, and risk factors for 204 countries and territories and selected subnational locations.

This dataset includes the following:

- Relative risks used by age and sex for each outcome for all risk factors except for ambient air pollution, alcohol, smoking, and temperature
- Relative risks used by age and sex for each outcome for the particulate matter integrated exposure response curve
- Relative risks used by age and sex for each outcome for alcohol use globally
- Relative risks used by age and sex for each outcome for smoking globally
- Data input sources for 15 dietary risks [added May 13, 2022]

For additional GBD results and resources, visit the [GBD 2019 Data Resources page](#).
